

Study Questions – Glycoengineering  
May 24th

1. What is glycan engineering?
2. What can be achieved through glycan engineering?
3. Which properties of glycans can be altered?
4. How would a biologist alter glycans?
5. How would a chemist approach glycan engineering?
6. How would an engineer approach the same problem?
7. What are the current limitations of glycan engineering?
8. If you had an unlimited ability to control glycan structure on the cell surface, to what end would you use it?
